

JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora set out on a cross country voyage in their RV. Newly retired, after spending many years working with his brother to manufacture their crane company into an industry leader, John had no idea that fateful trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling technologies was the end result of a road trip.

All through their trip, John reacquainted himself with past business connections along the way. In combination with these conversations and a significant event; two workers had been unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a considerable marketplace for a product that could promptly and securely elevate individuals in the air to accomplish upkeep and other construction services.

After their return from vacation, John set up a business with two of his friends and bought a metal fabricating business in McConnellsburg, Pennsylvania. Starting with a small crew of twenty staff, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates many of the simple design elements of that original lift into current models.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove came back from his fatefull cross-country trip and since the first JLG aerial platform entered the market. As of today, the company has expanded itself into quite a few global marketplaces and continues to cultivate contemporary machines to ensure that consumers are able to become safer and more resourceful within their workplace.
